Work Experience

Full-Stack Engineer | *Magic Hour AI* Nov 2025 – Present

- Built responsive React and Next.js interfaces for media creation and discovery, including reusable forms, interactive editors, upload workflows, and draft recovery.
- Developed TypeScript backend APIs and authenticated server actions with shared validation, asset ownership checks, project creation, and credit-based billing; integrated pricing and Stripe checkout flows.
- Integrated generative image and video models into web and public API workflows, connecting model configuration, generation requests, worker dispatch, and multi-step creation flows.
- Improved workflow reliability through state restoration, server-side pricing enforcement, and regression tests covering authentication, validation, billing, and failure recovery.

Prototyping Intern | *Magic Hour AI* Jun 2025 – Nov 2025

- Prototyped AI image/video workflows with Python, ComfyUI, and GPU-backed Jupyter/Colab; partnered with the CEO to compare Wan 2.2, Qwen Image Edit, and InfiniteTalk for speed, quality, and product fit.
- Built a stock-footage and text-to-speech video-generator prototype, refining clip-selection prompts, provider fallbacks, and video post-processing.
- Automated workflows with Python and n8n, exported ComfyUI generations to Google Sheets for review, and packaged experiments as Colab notebooks and Python CLI tools.

Freelance Frontend / Full-Stack Developer | *Upwork* Dec 2023 – Aug 2024

- Delivered **6 client web products** with responsive React, Next.js, TypeScript, and TailwindCSS interfaces and backend integrations, completing accepted paid milestones.
- Saved **$15K+** in design and operations costs for **Juice.gg** by building an internal AI platform for prompt-based website case creation.
- Reduced admin content update time by **70%** with role-based access, CRUD workflows, structured generation history, analytics, and SEO updates.

Projects

Juice.gg Admin Case Builder | *Next.js, TypeScript, Gemini, Nano Banana Pro*

- Built an AI case-generation admin tool with prompt-based generation, CRUD workflows, and versioned image history; delivered **15x ROI to date** based on client-reported cost savings.

Outreach AI | *Next.js, TypeScript, Supabase, OpenAI, Stripe*

- Built an AI outreach SaaS workflow with resume and job-description parsing, OpenAI generation, Supabase authentication, Stripe credits, and server-side validation.

Interview Pal | *Next.js, TypeScript, Firebase, Vapi, Gemini* | GitHub | Demo

- Built a real-time AI mock interview app with Vapi voice calls, Gemini feedback, Firebase authentication, and persisted interview sessions.

Jobshot Manager | *Next.js, TypeScript, Supabase*

- Built a contractor job tracking app with image uploads, draft review, project categorization, Supabase storage, and row-level security policies.

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js, TailwindCSS

Backend & Data: Node.js, FastAPI, Express, Prisma, SQL, MongoDB, Supabase, Firebase

APIs & AI: REST APIs, GraphQL, WebSockets, oRPC, AI/LLM Integrations

Testing, Cloud & Tools: Vitest, Jest, Docker, GCP, Git

Education

University of Toronto Nov 2023 – May 2024

Full Stack Engineer Certificate – UofT SCS Coding Boot Camp
