TECHNICAL SKILLS

Technical Skills: TypeScript, JavaScript, Python, Node.js, FastAPI, Next.js, React, Express, Prisma, SQL, MongoDB, Supabase, Firebase, REST APIs, GraphQL, WebSockets, Vitest, Jest, TailwindCSS, Docker, Kubernetes, GCP, AWS, Git, AI/LLM Integrations

WORK EXPERIENCE

Software Engineer | *Magic Hour AI* | *Next.js, TypeScript, React, Prisma, SQL, AI* *Nov 2025 – Present*

- Shipped production creator workflows for **5M+ Magic Hour users**, as measured by release-ready text-to-video, image-to-video, face swap, and AI image generation interfaces, by building reusable **Next.js, React**, and **TypeScript** components.
- Reduced AI generation debugging time by **35%**, as measured by fewer manual reproduction steps, by adding structured request state, error surfaces, and generation metadata to creator-facing workflows.
- Improved feature delivery reliability across **12+ production releases**, as measured by shipped pull requests reaching production, by implementing typed Prisma queries, SQL-backed state flows, and TailwindCSS UI updates.

Prototyping Intern | *Magic Hour AI* | *AI, Python, Next.js, TypeScript* *Jun 2025 – Nov 2025*

- Validated **8 AI product prototypes**, as measured by shipped internal demos, by building Python and TypeScript experiments for video, image generation, prompt workflows, and automation tools.
- Cut prototype handoff time by **30%**, as measured by reusable implementation notes and component plans, by converting ambiguous product ideas into scoped frontend, API, and data-flow requirements.
- Increased prototype-to-build clarity for **4 creator workflows**, as measured by accepted engineering plans, by documenting edge cases, prompt inputs, API assumptions, and production integration paths.

Freelance Frontend / Full-Stack Developer | *Upwork Freelancer* | [Portfolio](#) *Dec 2023 – Aug 2024*

- Delivered **6 client web products**, as measured by accepted paid milestones, by building responsive React, Next.js, TypeScript, and TailwindCSS interfaces with backend integrations.
- Saved **\$8K+** in design and operations costs for **Juice.gg**, as measured by reduced external design work, by building an internal AI case-generation platform for prompt-based website case creation.
- Reduced admin content update time by **70%**, as measured by fewer manual edits per case, by implementing role-based access, CRUD workflows, structured generation history, analytics, and SEO updates.

PROJECTS

Juice.gg Admin Case Builder | *Next.js, TypeScript, Gemini, Nano Banana Pro*

- Delivered **10x+ ROI**, as measured by client-reported cost savings, by building an AI case-generation admin tool with prompt-based generation, CRUD workflows, and versioned image history.

Outreach AI | *Next.js, TypeScript, Supabase, OpenAI, Stripe*

- Built an AI outreach SaaS workflow, as measured by resume and job-description parsing inputs, by implementing OpenAI generation, Supabase auth, Stripe credits, and server-side validation.

Interview Pal | *Next.js, TypeScript, Firebase, Vapi, Gemini* | [Github](#) | [Demo](#)

- Built a real-time AI mock interview app, as measured by completed voice interview sessions, by integrating Vapi voice calls, Gemini feedback, Firebase auth, and persisted session storage.

Jobshot Manager | *Next.js, TypeScript, Supabase*

- Built a contractor job tracking app, as measured by image upload, draft review, and project categorization workflows, using Next.js, TypeScript, Supabase storage, and RLS policies.

EDUCATION

University Of Toronto

Nov 2023 - May 2024

Full Stack Engineer Certificate - UofT SCS Coding Boot Camp
